

JERO HALILI

Software Developer

Angeles, Philippines • jerobusiness20@example.com • 09478073922 • jerohalili.is-a.dev

Software & Automation Developer with 2.5+ years of experience specializing in web applications, SQL databases, and local AI workflows. Expert in utilizing Astro, React, Python, and n8n to optimize administrative operations, automate cross-channel data pipelines, and drive technical digital transformations.

SKILLS

Languages & Frameworks: Full-Stack Development, React, Astro, Flutter, Python, TypeScript & JavaScript

Data & Cloud: SQL, MongoDB, Firebase & Supabase, AWS, Database Administration, SaaS Architecture

AI & Automation: AI Orchestration, n8n Workflow Automation, Content Automation, Cross-Channel Pipelines

EXPERIENCE

Technobyte X Guest Unlimited Inc. | Social Media Marketing Automation Specialist **Dec 2025 – Present**

- Designed an end-to-end automated Facebook marketing ecosystem using n8n and LLM integration using Retrieval-Augmented Generation (RAG), reducing manual content creation time by 70%.
- Engineered an asynchronous, human-in-the-loop approval pipeline that ensures 100% brand consistency across multi-platform publishing schedules.
- Deployed self-hosted, data-sensitive automation pipelines connecting cross-channel APIs to streamline complex, multi-step marketing workflows with minimal manual intervention.

PBSI Inc. | Database Administrator & Web Developer **March 2024 – December 2025**

- Modernized 34 years of student records (1992–2026) by migrating legacy manual archives to a secure, centralized SQL system.
- Reduced data retrieval latency by 40% through indexing and schema optimization, supporting real-time access for school leadership.
- Engineered automated reporting pipelines that eliminated manual entry errors and cut monthly report generation time by 24 hours.

Freelance | Full-Stack Developer **March 2024 – June 2026**

- Architected headless CMS solutions using Sanity.io, enabling non-technical users to manage structured content independently while reducing editorial turnaround times.
- Eliminated 100% of recurring hosting costs for diverse client portfolios by deploying optimized production environments on GitHub Pages.
- Prioritized core web vitals and mobile-first usability over complex animations, ensuring fast initial load times and high conversion potential for client assets.

EDUCATION

Holy Angel University **March 2027**
Bachelor of Science in Computer Science (running for Dean’s Lister) Angeles City, Philippines

Angeles City National Senior High School **June 2023**
ABM Highschool Graduate with Honors Angeles City, Philippines

PROJECTS

Automated AI Marketing System **n8n, Local LLMs, Python**
Engineered an end-to-end automation pipeline leveraging local Large Language Models to autonomously generate marketing copy and visual assets. Implementing manual approval gates and human-in-the-loop validation to ensure brand safety and quality control.

School Website & Admin Portal **MERN Stack, SQL**
Built a secure administrative portal for student organization data, event scheduling, and membership management, implementing role-based access control (RBAC) and secure authentication to guarantee data integrity across user roles.

Artist Portfolio (JKISINAMAL) **Astro, Tailwind CSS, Sanity.io**
Built a modern visual portfolio with Astro, Tailwind CSS, and Sanity CMS by replacing a legacy platform to eliminate 100% of hosting costs, enable self-serve content editing, and deliver fast load times through asset caching, optimized image delivery, and custom glassmorphic UI elements.
